JOB EXPERIENCE

FrontEnd Web Developer

Intern at Cooperativa CRAC (March 2020-September 2020)

I participated as a volunteer to get my first experience in a project to build the first CRM for the logistic department. I was a junior developer on a two-person team. I learn how to make responsive webpages and manage data via an API.

SIDE PROJECTS

IronFit

https://ironhackfitness.herokuapp.com/

App to create gym routines, track them and compare results. It use technologies as NodeJs, MongoDB, Handlebars.

Portfolio

https://portfolio-christian-gecchelin.netlify.app/

Here you can see all my side projects, contact to me and download my cv.

EDUCATION

Tecnicatura Web Development

ISSD (2019-2022 unfinished)

I have completed half of my degree. I'm now working more slowly since I want to develop my corporate experience. In C++, I pick up the fundamentals of programming. Additionally, learn about web technologies like Js, SQL (basic), and Figma.

Web Development Bootcamp

IRONHACK (2022)

In university I learned the fundamentals, but to acquire a job I needed to study new programming languages like Node, Mongo, or Js libraries like ReactJs. Ironhack is a bootcamp that teaches you about trending technologies of the industry.
